PREFACE I

LAKENHAM CEMETERY

Established 1713 per "Dene"

This is the oldest cemetery in the town of Carver and was established when the area of Carver was still a part of Plympton. Carver separated from Plympton and was incorporated in 1790.

There are two types of listings:

The first is a list of all existing information copied from each stone from each section including epitaphs if readable.

The second is an alphabetical listing of all the names with their dates and relationships noted and in the case of a married woman, she is also listed a second time under her maiden name if given. The section where each person is located is shown in the right margin of the index.

I have divided the cemetery into sixteen sections and assigned my own letters or numbers to each.

A key map shows where the sections are located within the cemetery.

The beginning of each section has a map with the family name of most stones located in their approximate location. The maps are more of a schematic and are not intended to be to an exact scale, however they are about 25 feet to the inch. If several stones in a row have the same last name, the map might only show one or two due to lack of space.

An arrow on the map shows the starting point at each section and the direction to proceed. Some sections were split in half as the stones faced different driveways as you walk around the section.

Other parts of the cemetery are not divided by driveways and in those sections the names are listed by row numbers from left to right.

Many of the old soft white marble stones have deteriorated to the point where some wording cannot be deciphered, also the older slate stones have reached the same status with some showing only a stub of the lowest part of the stone which leaves all the wording missing.

In the early 1850's a person by the name of Charles M. Thatcher copied information from the grave stones and markers in most of the cemeteries in southeastern Massachusetts. His list was later transcribed and published by the Middleborough Public Library entitled: "Old Cemeteries of Southeastern Massachusetts," copies of which may be purchased through them.

I have found this list very helpful when I could only decipher portions of a stone but with enough information so I could match it with the Thatcher list and complete the listing.

The partial information that I have taken from the above list is in ***bold italics*** and an asterisk "*" precedes the name.

Two asterisk's "*" preceding a name and ***with all information in bold italics*** indicates that name and all information was copied from Thatchers list and was not found by me on any of the readable stones as the stones may have eroded or disappeared since his listing.

These names would only appear in the alphabetical section of my booklet as there is no way of

II

knowing where that person was buried. There are forty four such names listed that I could not find stones for.

I did find a few errors in Thatcher's listing but that's understandable in such a huge undertaking as his.

The symbol "Æ" on some of the stones = age and is typed "AE" herein.

Words or portions of words that I could not decipher are indicated by "---" or "--?--". Information in parenthesis (info) was added by me and was not taken from the markers or Thatchers listing.

The graves of veterans that have separate bronze or other types of flag holders are listed such as: GAR (Grand Army of the Republic); USV (U. S. Veteran); American US Veteran; SAR 1775 (sons of the American Revolution; Vietnam, etc. Other fraternal markers such as IOOO (International Order of Oddfellows) are also listed if spotted.

The old style of the letter "s" appears almost like an "f" inscribed on many of the stones in the 1700's.

In the cases where that style of engraving was used, I typed in the letter "f" and in some names I have repeated the word as it would now be spelled, such as: Mifs (Miss) Lucaf (Lucas).

There are 1,337 entries in the alphabetical index.

The oldest burial I found was October 20, 1719 for Joseph Robbins a 16 day old child located in Row 3, Section "O". (There may be others older, but if so, their stones are missing or unreadable)

The oldest birth I found was 74 year old Nathaniel Atwood born in 1650 and died Dec.17, 1724 located in Row 5, Section "O"

Some of the more common names occurring in this cemetery are listed below:

75 Cobb	45 Cole
61 Shaw	41 Barrows
61 Sherman	31 Robbins
60 Lucas	25 Vaughan
48 Atwood	23 Chandler
46 Shurtleff	22 King

Main entrance to Lakenham Cemetery

A portion of the oldest section in the cemetery

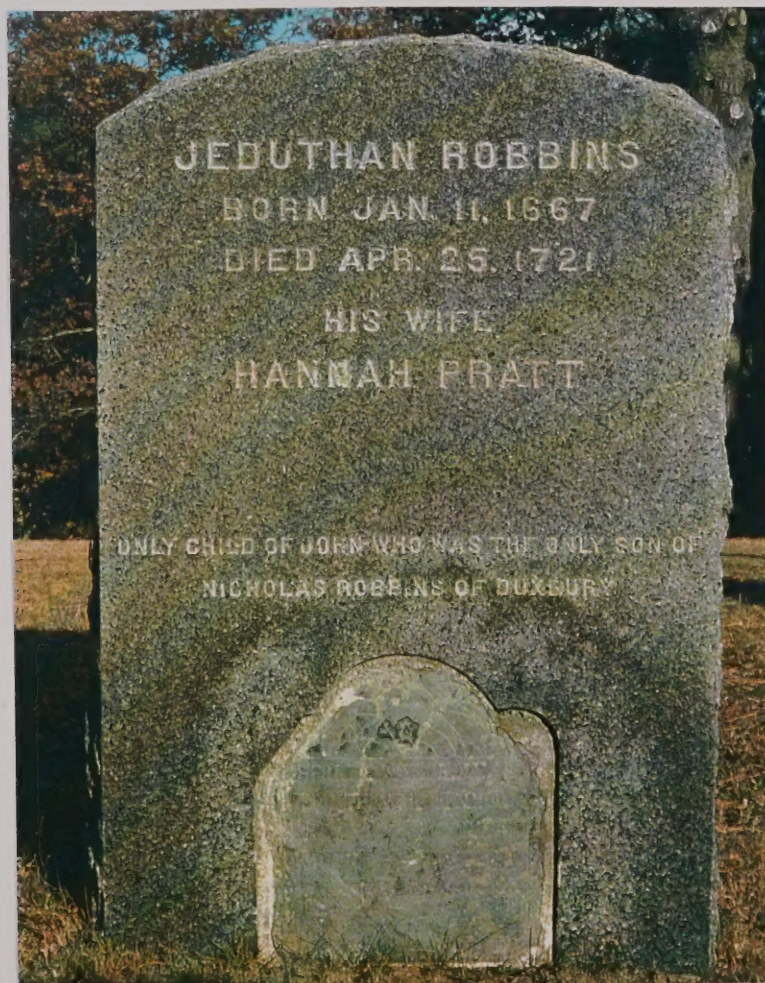

A good example as to why it was prudent to get available information while still visible and before broken portions of stones disappeared

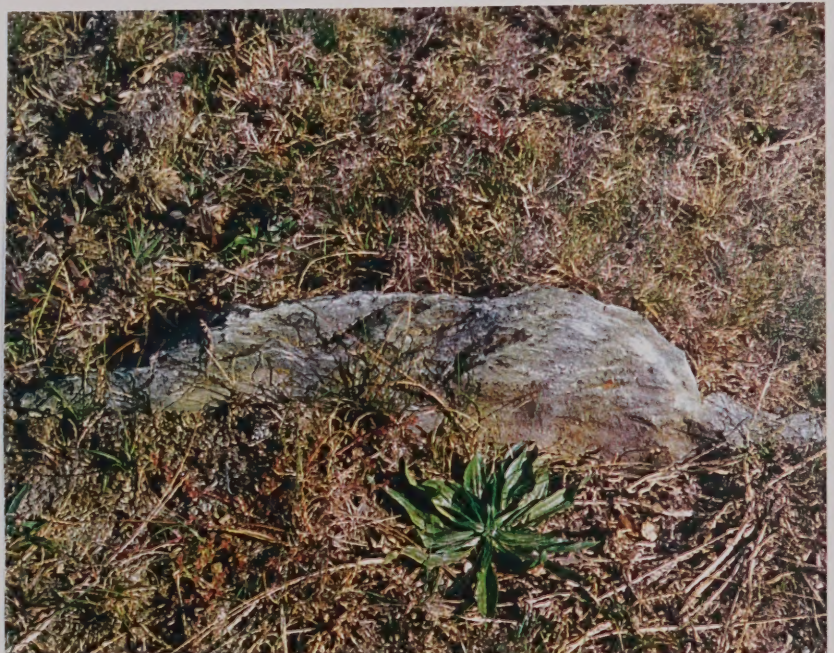

The top two stones have just enough information to compare with "Thatchers" listing for the remainder of the wording

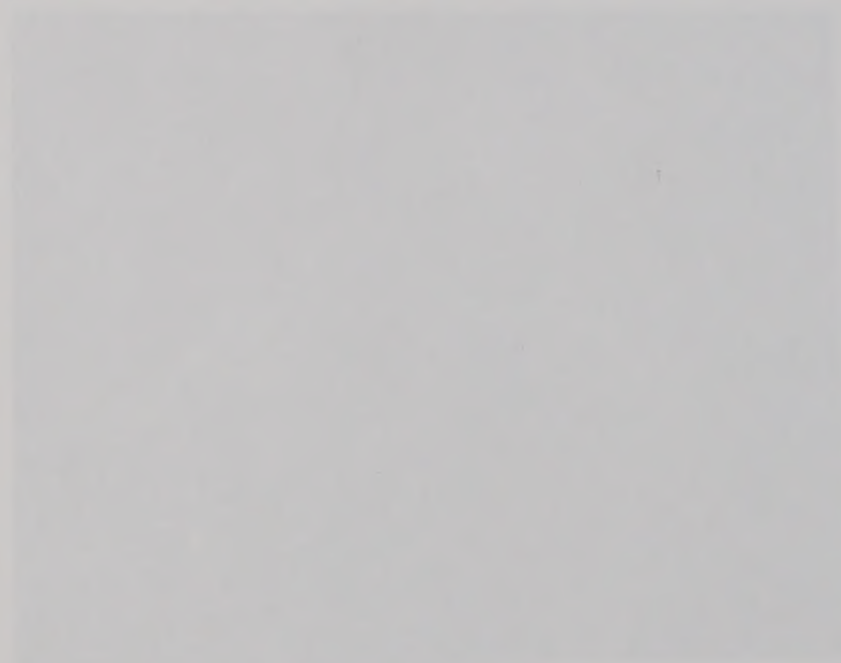

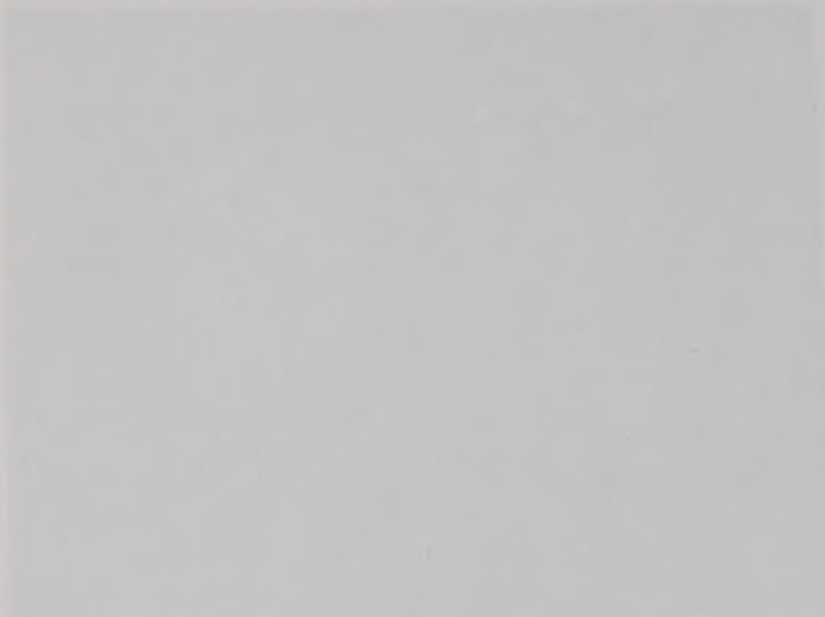

An excellent example of preserving an old stone by encasing it within a new granite stone

An example of slate stones
that have deteriorated to the
extent that they are now
unreadable with all infor-
mation gone forever

As compared with other
the first described in the
which that they are now
in which the first of them
which first of them
